

Optimise, integrate and digitally transform your transport operations with Teletrac Navman's Orcoda Logistics Management System (OLMS). Streamline your transport and supply chain logistics with 100% visibility. This cloud-based software enables your team to rapidly implement control over field operations in real time, thus reducing risk and improving efficiency.

Optimise your fleet, staff and route from one central platform

- Increase: trips per vehicle, collections/deliveries per day and billable kilometres
- Automated schedules and rosters that comply with constraints and adapt to changes in real time
- Handles networks with multiple depots, loading docks, collections and deliveries

Deliver better service to your customers

- Front-end booking platform/CRM, which includes a payment gateway
- In field completion – live status
- Meet customer delivery windows
- The Orcoda Notify App is free for your customers to download and track deliveries

Risk Reduction

- Constraint management for vehicles, workforce and customers
 - ✓ Capacity within vehicles - size and weight restrictions
 - ✓ Manage driver fatigue (start times, breaks)
 - ✓ Safety alerts – lifting parcels with trolley / forklift / hydraulic tray
 - ✓ Depot constraints - number of deliveries/collections per time slot
- Chain of Responsibility (CoR) compliance
 - dashboard and alerts that comply with government regulations

Efficient and compliant transport operations enable a reduction in resources and costs, giving an immediate ROI.

GO DIGITAL

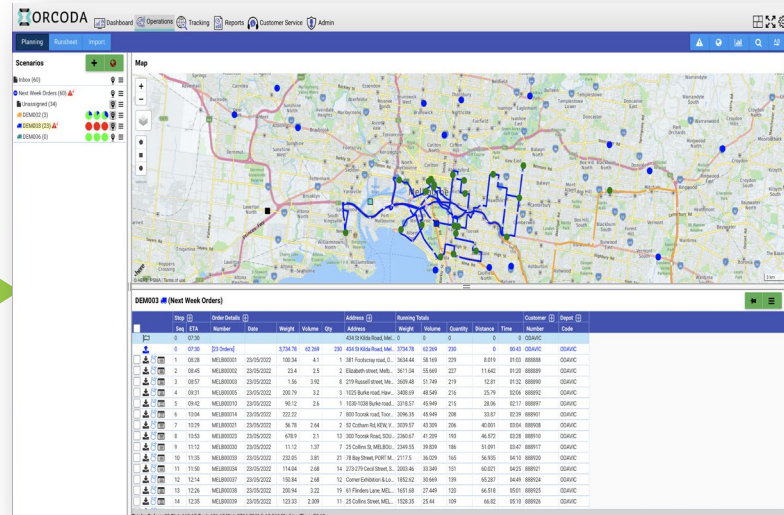

Data Optimisation

Account for every attribute and multiple constraints of your transport operation

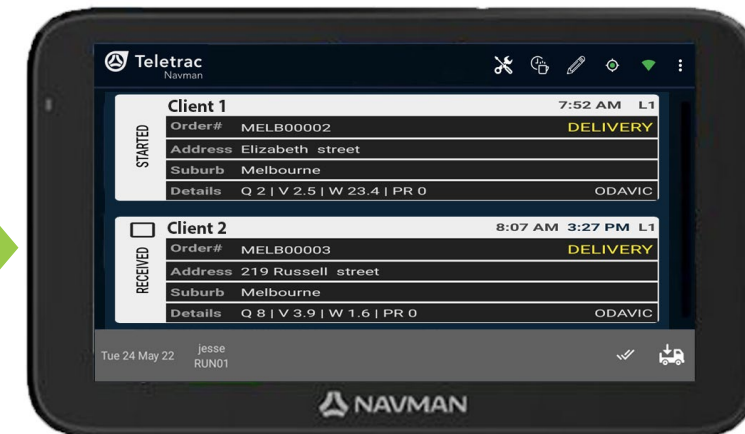

AI

powered solution for job allocations. Creating schedules and runsheets, that comply with multiple constraints

Data gets optimised to accurately allocate jobs whilst integrating with Teletrac Navman

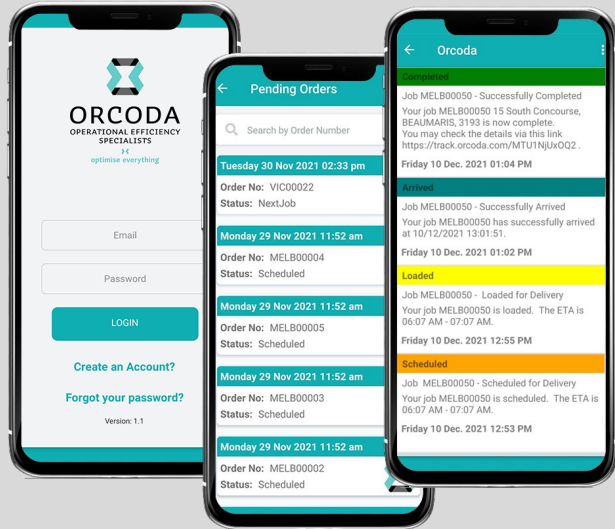

Optimised In-vehicle Runsheet

Orcoda Notify App

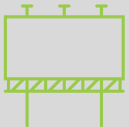

Your customers download the
FREE Mobile App.

Once logged in as your customer, they can get real-time status updates on deliveries and collections and review their account.

Marketing Messages

Increase sales through in-app messages

Branding

Delivery information will display your company logo

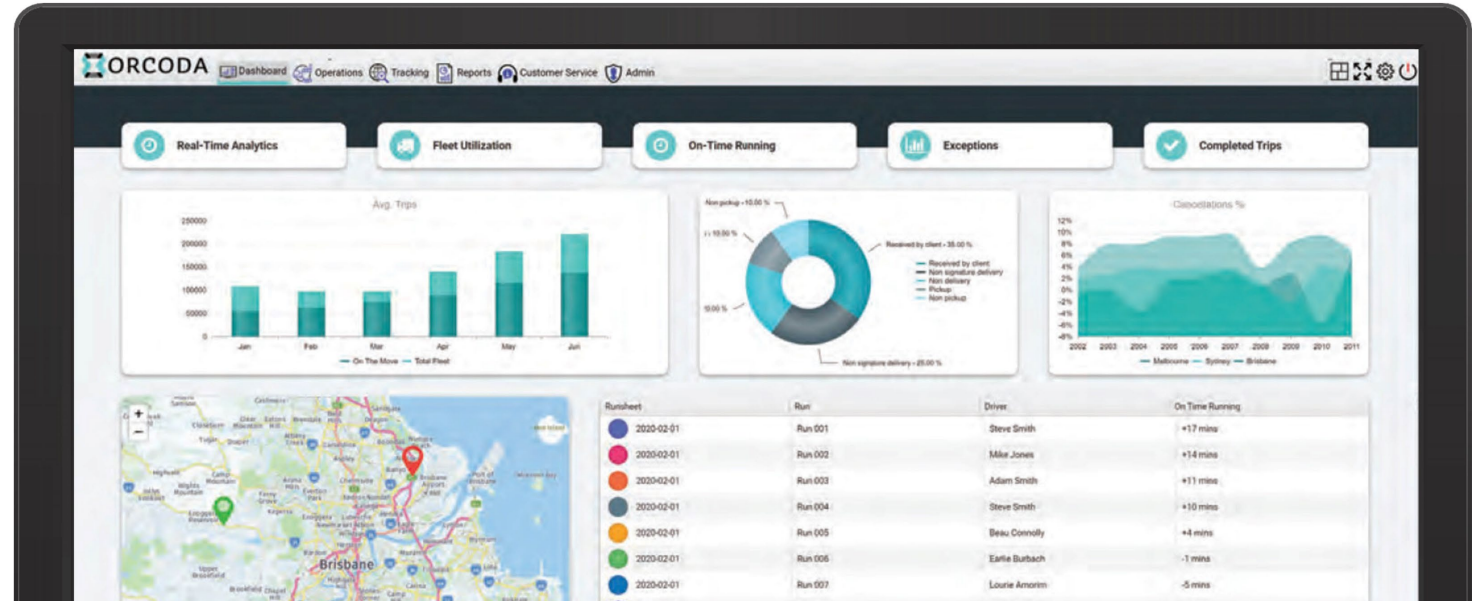

Customer Retention

Increase repeat customers who download and re-use the App

One central platform to control

Field Operations, Optimisation, Tracking, Reports, Customer Service Records, Administration

“The OLMS solution has brought management, transparency and consistency as well as increased visibility, efficiency, control and accountability of our delivery process.” - Nick Pappagianis, Transport Manager, Vic
