1. VEHICLE POOLING SOLUTION – BOOKING APP

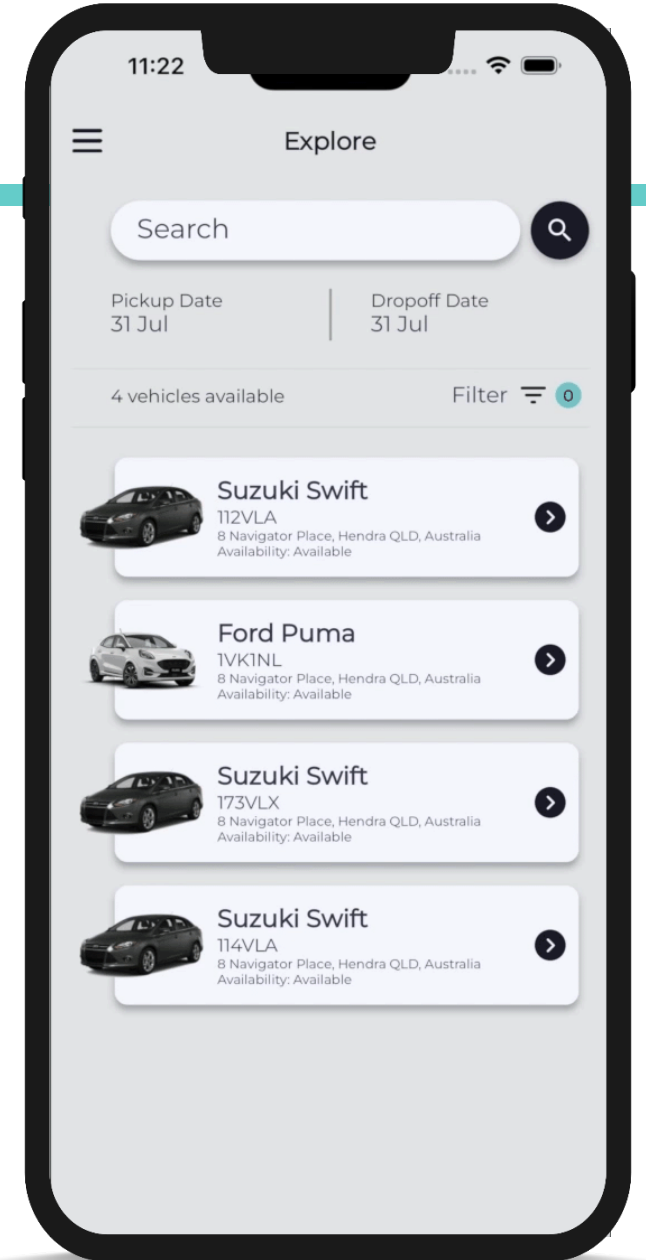

Gain a big-picture view of your total vehicle-pooling fleet with detailed and accurate information in **real-time**.

By collecting data from **multiple manufacturers** and accessing it from within the one central platform, you can connect all your vehicles.

KEY POINTS

- Increases fleet utilisation across your operation through an easy-to-book system
- Automating tasks and self-booking/self management of vehicle pooling functions will reduce the workforce cost of managing your fleet
- Ability to visualise redundancy factors to reduce fleet size

Complete booking

Journey info
recorded in the
Management Portal

Search and book
the vehicle

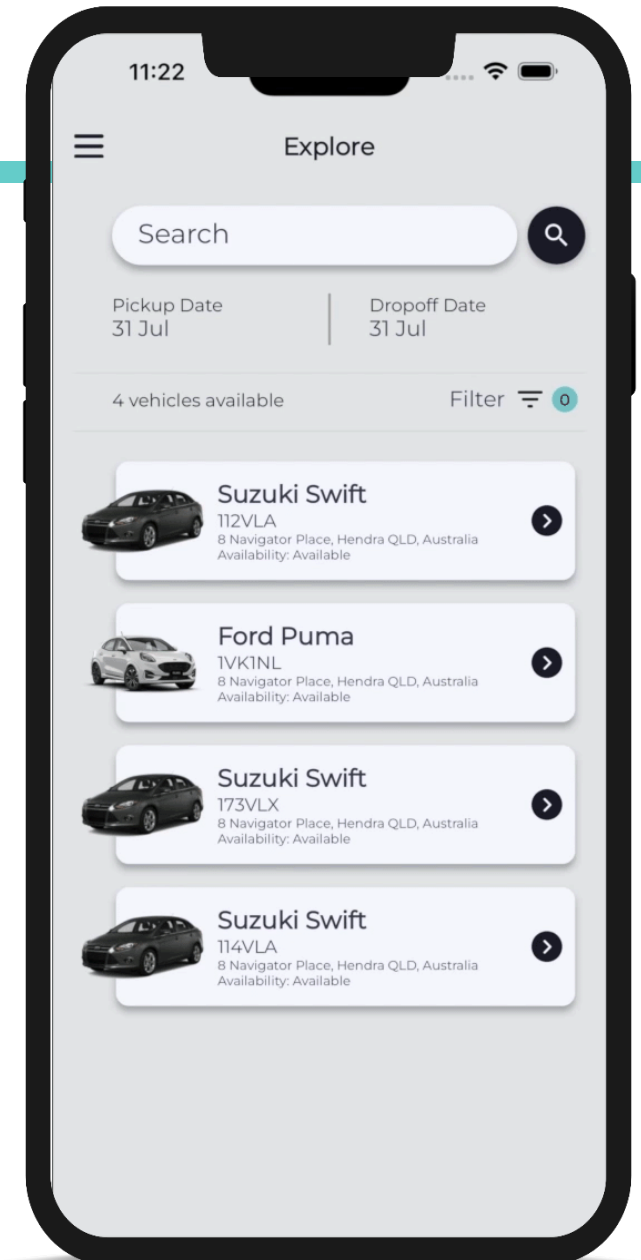

Locate the Vehicle

Vehicle	Time	User	Estimated kms	Status
	10:05am	Lovella	41 km	On time
	10:05am	Dan	26 km	Late
	11:05am	Jesse	81 km	On time

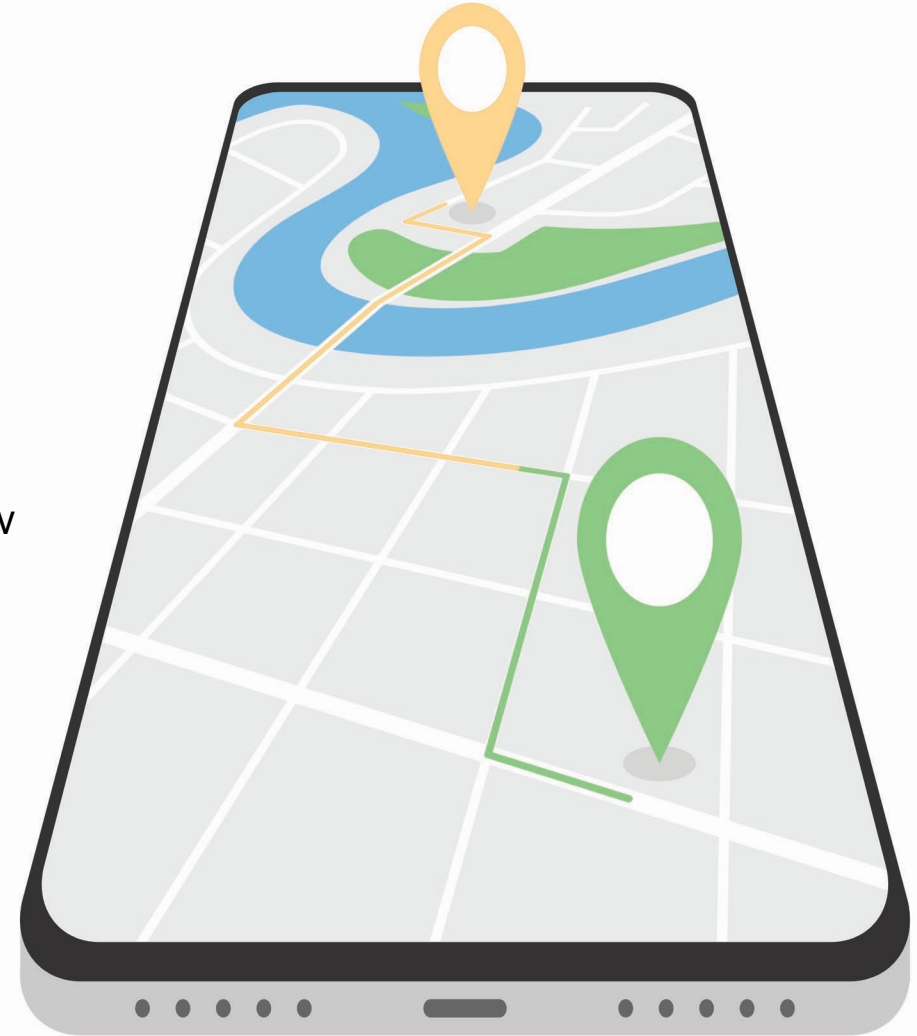

BOOK THE VEHICLE

1. Search available vehicles that match your criteria
2. Click on any listed car to see further details
3. Make a selection
4. Read and accept terms and conditions in order to complete the booking
5. Access your confirmed bookings from your account
6. Receive a notification that the vehicle has been booked

LOCATE THE VEHICLE

- When its time to start your booking, your staff can then locate the vehicle using the “pin” icon on the vehicle booking.
- Staff cannot locate the vehicle prior to the start of their booking
- ORCODA CONNECT uses the GPS mapping app in the users' phone to show the location of the car
- An image of the car’s model and the REGO is provided within the app

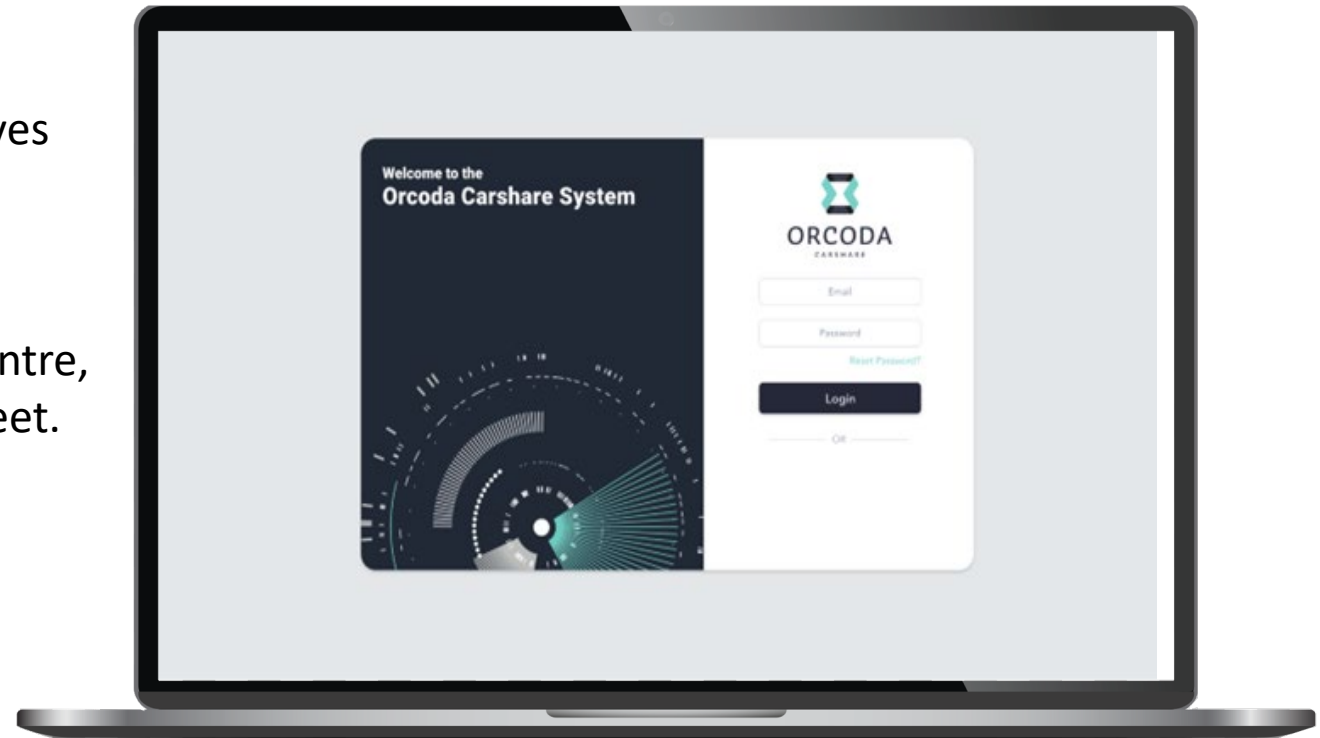

THE MANAGEMENT PORTAL

Track & Manage your Fleet

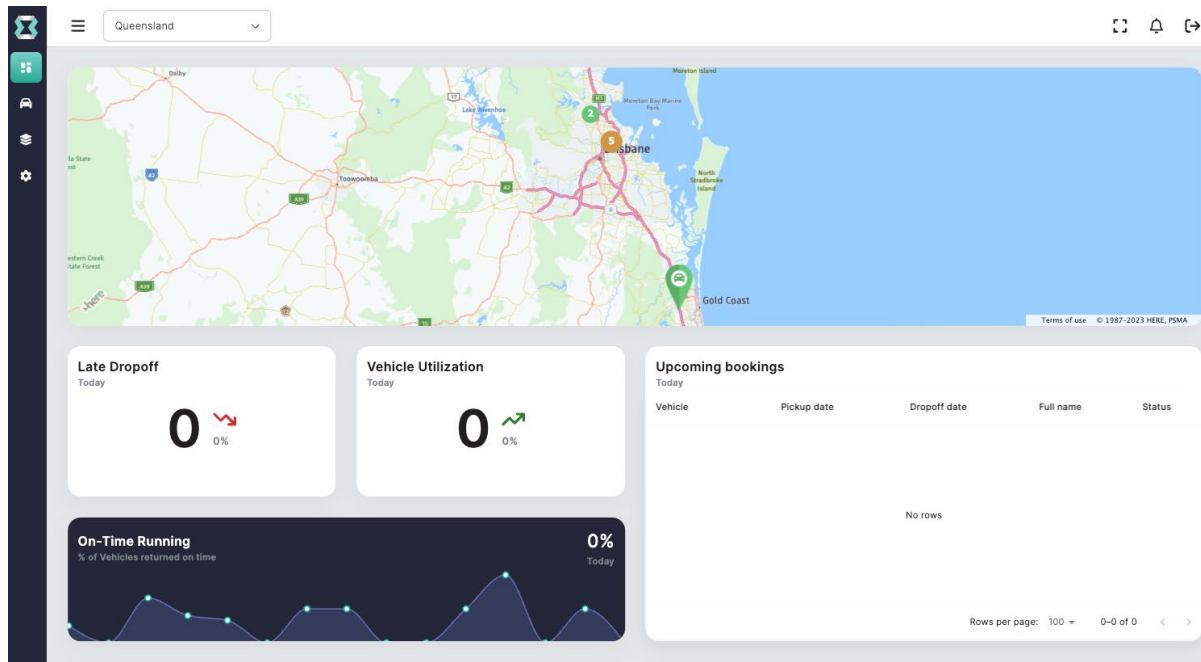

Connecting all your vehicles on one booking platform gives these benefits:

- Booking system eliminates dual booking
- Substantially reduces # of required staff to run call centre, vehicle bookings, car park and car-pooling for your fleet.
- Tracking of vehicles is matched to staff member
- Pick-up time and drop-off time stamped in database
- Notification service for booking information

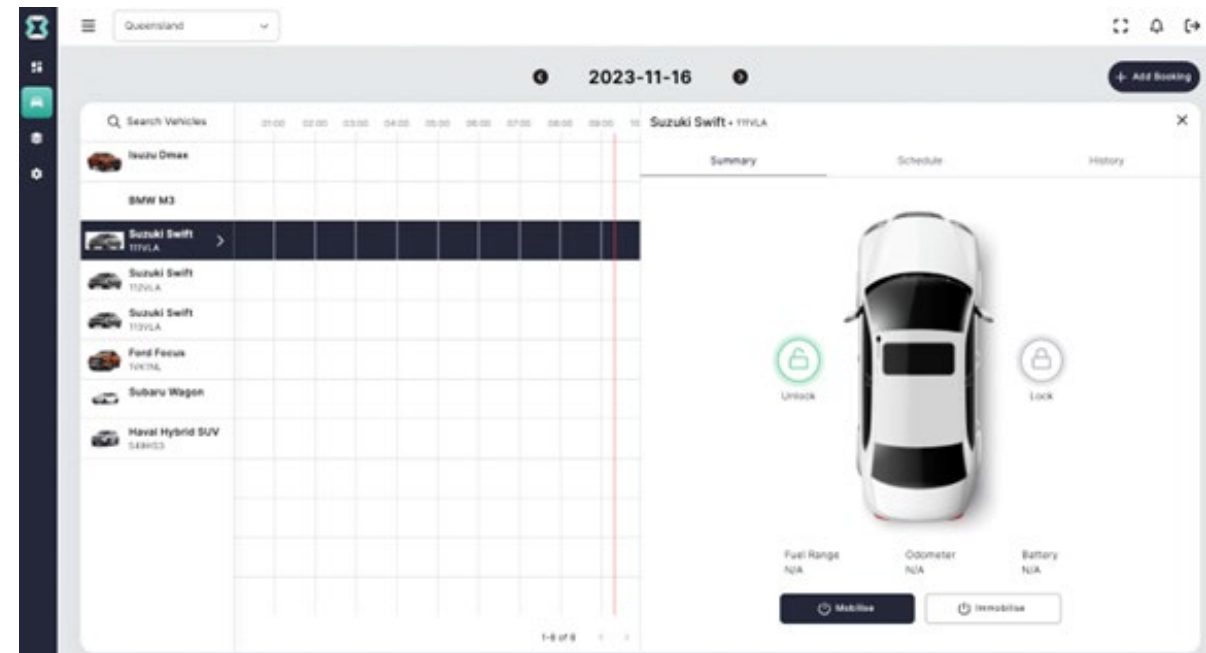

Dashboard

- Late Pickups and Returns
- Vehicle Utilisation stats
- Upcoming Bookings

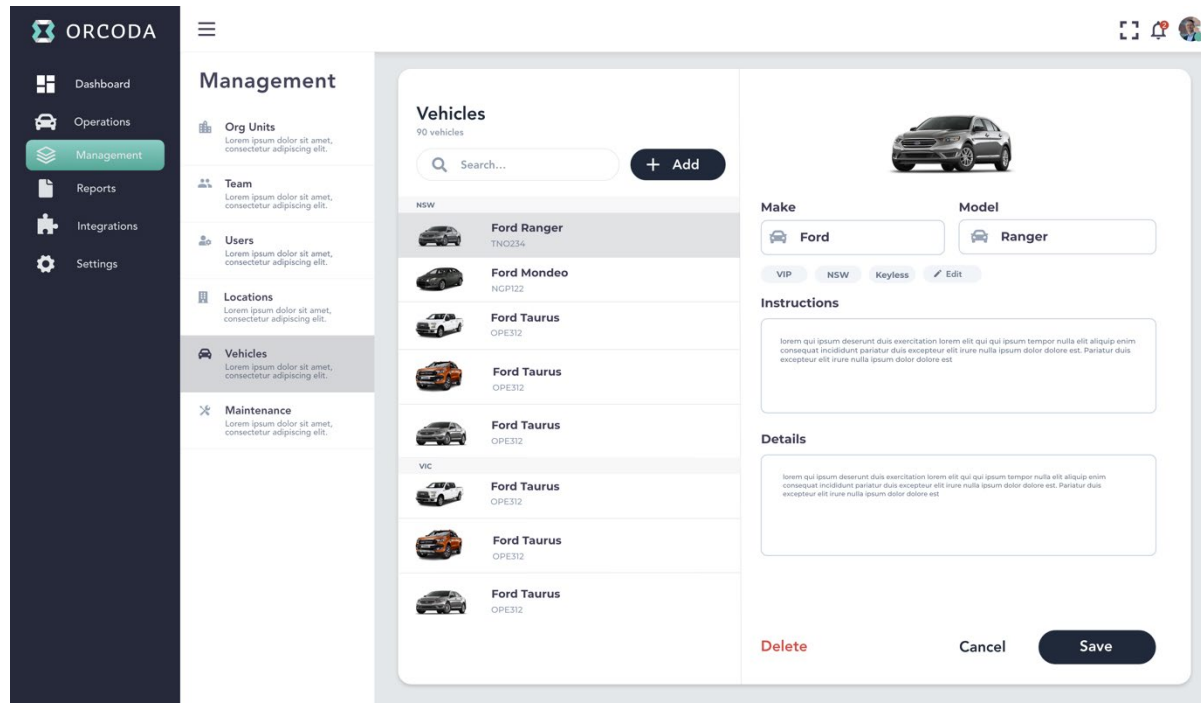

Operations

- Track and locate your vehicles in real time
- Notifications of late vehicles in real time
- Map of vehicle locations

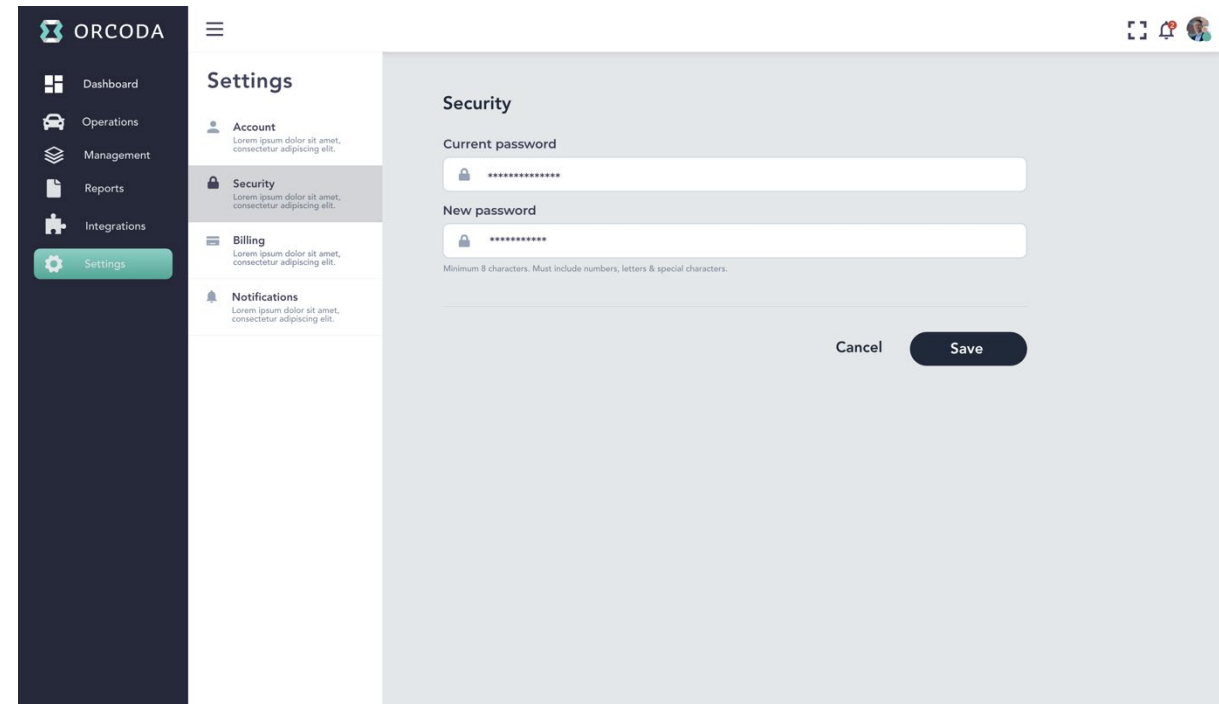

Management

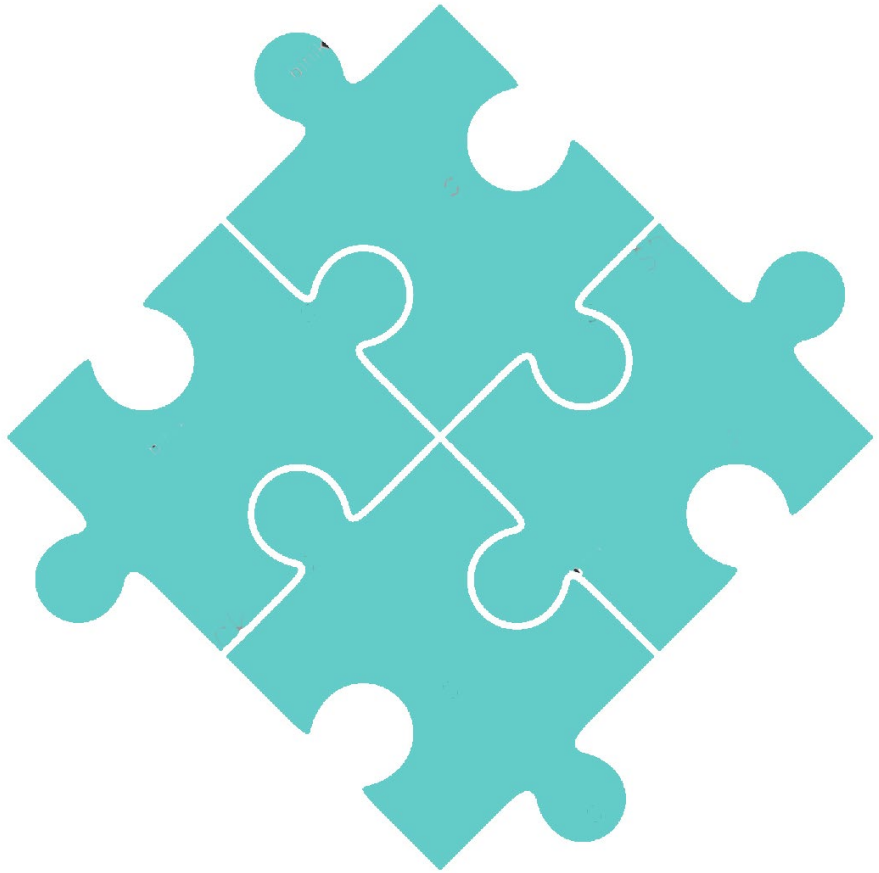

- Depots and locations
- Users and team members
- Vehicles and maintenance

Settings

- Account information
- Security – Password and Usernames
- Notifications
